

I am a registered voter and firm supporter of satellite radio. I am adamantly opposed to any attempt to restrict the programming that includes Instant Traffic & Weather. I respectfully urge the FCC to reject NAB petition 04-160. As a frequent traveler for both business and pleasure, I depend on the Instant Traffic & Weather broadcasts in addition to the fine music selection provided by XM radio. As a paid subscriber to XM radio I view any consideration of this petition as a personal attack against my rights as a citizen to enjoy legal services purchased within the public domain.
